DETAILED ACTION

The amendment filed 12/9/04 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1, 2, 7-13, and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glew in view of Hollinrake et al..

Glew shows an embodiment of a conveyor assembly in Figures 6 and 7 comprising two longitudinal supports (34,35), a substantially planar support plate (59), floor sections (50) slidably attached to each support (34,35) to selectively reveal an

Application/Control Number: 10/082,740

Art Unit: 3652

opening in alignment with a conveyor (18), and slanted members (55) directed downwardly toward the conveyor. While Glew broadly discloses its conveyor assembly as being usable with "commercial trucks", he does not specifically mention pivotally mounted dump trucks as is called for in claims 1 and 12 of the instant application. Also, Glew uses planar members (55) rather than curved members for directing material towards its conveyor.

However, the patent to Hollinrake et al. shows a dump truck body having a conveyor substantially similar to Glew's assembly, but the Hollinrake et al. body is pivotally mounted to a frame (see Fig. 9). Further, the Hollinrake et al. patent shows it is old and well known to provide *curved* lower corners on dump truck bodies (see Fig. 7) to direct flowable material towards the conveyor.

Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the Glew conveyor assembly on a pivotable dump truck frame as taught by Hollinrake et al. to create a means of quickly dumping a large quantity of material at selected sites. The resulting body would be structurally stable since it would still have transverse support members (see members 19-21 in the Glew patent), but these support members would not be directly attached to the longitudinal support members (34,35). Also, it would have been obvious to at least partially curve the member (55) of the Glew assembly similar to that shown in Figure 7 of the Hollinrake et al. patent such that the concave shape of the resulting members would increase the space within the truck body.

Allowable Subject Matter

4. Claims 3-6 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean J. Kramer whose telephone number is (703) 308-2181. The examiner can normally be reached on Mon., Tues., Thurs., Fri. (7:00-5:00).

Art Unit: 3652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on (703) 308-1113. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
